

Results on the Life Styles Inventory™, while always illuminating, are even more insightful and impactful when accompanied by interpretative text. Provide your people with STYLUS feedback—tailored to their LSI profile, written by experts, and presented with “no holds barred.”

LSI STYLUS®

Take Individual Development to the Next Level.

Go Beyond LSI with LSI STYLUS

LSI STYLUS is designed for the assessment and development of all organizational members, including those in managerial or professional positions. It is a computerized application that creates a fully customized report based on an individual's LSI 1 and/or LSI 2 inventory results. The report can be generated either as part of an LSI STYLUS 1 and/or 2 Kit, or after the participant has completed a traditional LSI 1 and/or LSI 2 and subsequently desires more detailed and personalized feedback.

Discovering the Real You

After the paper or Web-based assessment has been completed, LSI STYLUS 1 converts the individual's inventory results into a 50-70 page, computer-generated report. The in-depth report directly confronts the individual with feedback that he/she might not want to read, but most likely needs to “hear.” Personalized for the focal participant, it is frank and honest—the kind of feedback necessary for self-understanding and positive change. The report is based on the latest psychological and organizational behavior interpretation of the LSI. It is a psychologically-based tool designed for individual growth and self-management.

When used with LSI STYLUS 2, the participant receives specific, constructive feedback on the implications of his/her behavior from associates. The report then combines this feedback with information about how the individual perceives him/herself for an accurate description of personal strengths as well as potential development needs.

PRODUCT APPLICATION

LSI STYLUS provides:

- Practical, results-oriented recommendations to help individuals build on strengths and improve areas needing development
- A comprehensive, easy-to-use action plan for setting development goals and committing to strategies for achieving them
- A continuous development system with re-testing capability built right into the process
